# SERVICES

## SERVICES

### 24-HOUR EMERGENCY AND URGENT TRANSPORTATION SERVICE

**Vital Care** offers its customers a Pre-Hospital and/or Inter-Hospital Emergency service, guaranteeing a multidisciplinary team of properly trained and accredited healthcare professionals, supported by advanced life support vehicles and equipment.

## TAILORED HEALTH SOLUTIONS

Companies that work on large-scale projects and have a large number of employees need to guarantee their employees the provision of primary and emergency healthcare, preferably at their workplace.

**Vital Care** provides healthcare professionals who are properly trained and fully prepared for a clinical challenge in emergency situations.

Our selection processes are rigorous to ensure that only healthcare professionals with the appropriate qualifications and work experience are placed in the locations requested by clients.

## MEDICAL EVACUATIONS / AIR MEDICAL TRANSPORT

### MEDICALIZED AIRCRAFT

With the help of our air ambulances and/or helicopters, we cover the entire variety of patient transport throughout national or international territory, not only using airports, but also small airfields, mining projects, shipyards in remote locations and thus minimizing response time. in accessing healthcare and providing safe transport to the destination unit.

## COMMERCIAL AIRCRAFT

Monitoring patients on a commercial plane is a smooth and safe way to move patients by air, in a professional manner.

It is suitable for patients with a wide range of health situations that do not pose a risk of complications on a trip of this type.

Our service is provided in order to guarantee the entire pre-flight assessment, execution of the entire clinical and logistical process with the airline, guaranteeing definitive follow-up to the pre-determined destination health unit or home.

## SERVICES

### EMERGENCY TRAININGS

Modern, technical and controversial society has generated its own process of self-limitation. Road accidents, domestic accidents, work accidents, sports accidents and sudden illnesses are increasingly considered epidemiologically as a public health problem.

In view of the above, the **Vital Care** training center created several training courses, which aim to provide trainees with adequate theoretical and practical knowledge so that they can intervene in emergency situations.

## COURSES FOR THE GENERAL PUBLIC

- First Aid Level 1
- First Aid Level 2
- First Aid Level 3
- Pediatric First Aid Course
- Basic Life Support Course with Automatic External Defibrillator

## COURSES FOR HEALTHCARE PROFESSIONALS

- Intermediate Life Support Course
- Aeromedical Transport Course
- Pediatrics and Neonatology Aeromedical Transport Course

## SERVICES

### OCCUPATIONAL MEDICINE

**Vital Care** provides companies with Occupational Medicine exams, in accordance with current Angolan legislation (admission, periodic, dismissal, post-incident or return-to-workplace exams) with resources for complementary diagnostic exams suited to professional risks to which workers are exposed as well as the individual health situation.

## MEDICAL CARE / NURSING AT HOME

We provide medical and nursing care without leaving the comfort of your home. Through our Call Center you can request a medical consultation or nursing services, including laboratory tests.V

## MEDICAL ASSISTANCE FOR SPORTS, CULTURAL AND/OR RECREATIONAL EVENTS

Through a planned, discreet and effective presence, we ensure all prevention and medical assistance for your event, reducing any negative impact caused by an emergency situation.

From planning to operationalization, we guarantee an independent response in healthcare, carried out by experienced and dedicated professionals, supported by equipment and an emergency vehicle.
